Objective

Enthusiastic Software Engineering undergraduate with hands-on experience in full-stack, mobile and AI/ML-powered application development. Skilled in Java, Python, JavaScript, React.js, Node.js and Flutter with a strong foundation in object-oriented programming, databases, APIs, debugging and software development practices. Seeking a Software Engineering internship to contribute to real-world projects while strengthening my full-stack software development skills.

Education

BSc (Hons) in Software Engineering , SLTC Research University Faculty of Computing & IT	2023 – 2027
GCE Advanced Level - Physical Science Stream , Anuradhapura Central College	2012 – 2020

Projects

DevInsight - AI-Powered GitHub Analytics Platform , Team Lead Tech Stack: Python, Scikit-learn, XGBoost, GitHub API, Flutter Web, Supabase - Leading the development of a software analytics platform that integrates GitHub repository and CI/CD data to evaluate project activity and software development risks - Developing Python-based data processing and machine learning pipelines using GitHub API, Random Forest and XGBoost, with insights presented through a Flutter Web dashboard.	2026 – Present
Threadwise – Explainable AI Fashion Decision-Support Platform , Team Lead Tech Stack: React, TypeScript, FastAPI, Python, CLIP, XGBoost, SHAP - Developed a React and TypeScript frontend with FastAPI integration to support an end-to-end AI-driven fashion analysis workflow. - Processed 42,755 DeepFashion images and generated 512-dimensional CLIP embeddings for visual similarity analysis and product retrieval. - Integrated CLIP, XGBoost, and SHAP models into the application to deliver visual analysis, demand forecasting, and explainable AI insights.	2026
SmartCare Hospital Management System , Team Lead Tech Stack: Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, Maven, REST APIs, Postman - Developed a Java and Spring Boot hospital management backend using OOP principles and layered architecture for structured and maintainable application development. - Built RESTful APIs and CRUD operations using Spring Data JPA, Hibernate, and MySQL for reliable relational database integration. - Implemented validation, exception handling, and business logic, and tested REST APIs using Postman to improve application reliability and code quality.	2026

Technical Skills

Programming Languages

Python, Java, JavaScript, C/C++, TypeScript, Dart, SQL

Backend Development

Node.js, FastAPI, Spring Boot, Spring Data JPA, Hibernate, REST APIs, API Integration

AI / Machine Learning

Scikit-learn, OpenCV, Random Forest, XGBoost, CLIP, SHAP

Data, Cloud & DevOps

Power BI, Docker (Fundamentals), AWS EC2 (Fundamentals)

Tools & Collaboration

Git, GitHub, Maven, Postman, Swagger/OpenAPI, Jira, Figma, Arduino IDE, Android Studio

Web & Mobile

React.js, React Native, Flutter, HTML, CSS

Databases

MySQL, SQLite, Firebase Firestore, Supabase

Software Development Concepts

Object-Oriented Programming (OOP), Layered Architecture, CRUD Operations, Exception Handling, Debugging, Version Control, GitHub Flow, Agile/Scrum Fundamentals

IoT & Embedded Systems

ESP32, Arduino, Embedded C

Certifications

- Microsoft Applied Skills: Get Started with Classes, Properties, and Methods in C# - Microsoft Learn
- Building AI Solutions Using Advanced Algorithms and Open Source Frameworks - IBM SkillsBuild
- AI Concepts for Developers and Technology Professionals - Microsoft Learn
- Work with Generative AI Models in Azure Machine Learning - Microsoft Learn
- Enterprise Design Thinking Practitioner - IBM SkillsBuild

Leadership & Organizations

Student Interactive Society, SLTC, Faculty Representative (Faculty of Computing & IT) Coordinated student-faculty communication and supported academic initiatives for Computing & IT students.	03/2026 – Present
Student Interactive Society, SLTC, IT Batch Representative (2027A Batch) Represented the 2027A IT batch by coordinating student activities and facilitating technical communication.	04/2023 – Present
Get Sync Club, SLTC, Director of Research and Analytics Led research initiatives by analyzing data and providing insights for club decision-making.	2025 – 2026
IEEE WIE SBAG of SLTC (InspHER v3.0), Promotion Team Head Led promotional activities and outreach strategies to increase event awareness and engagement.	2025
IEEE Computer Society SBC of SLTC (Codemania v5.0), Technical Team Member Supported technical operations and event infrastructure to ensure smooth execution.	2025
